

Neighborhood Vitality Success Framework Project: How should the key “neighborhood success” indicators at your table be prioritized?

- Highest Priority – Strong sense of connection among neighbors
- Second Highest Priority – Feeling safe in the neighborhood
- Third Highest Priority – Rising Property Values
- Fourth Highest Priorities – Jobs, Education, Public/Private Investment

Additional Measures – levels of noise and air pollution, residents participating equally, use other measures besides the real estate market to define “value”; wealth building among residents

Additional Comments – some of these measures are similar and could be clustered; ask “does my neighborhood have these things”? better if jobs are local, located in neighborhoods.
